

Solid	Surface Area	Volume
Cuboid 	$2hw + 2hl + 2wl$	$h \times w \times l$
Cylinder 	$2\pi r^2 + 2\pi rh$	$\pi r^2 h$
Cone 	$\pi r^2 + \pi rl$ where $l = \sqrt{r^2 + h^2}$	$\frac{1}{3} \pi r^2 h$
Pyramid 	Sum of areas of all the faces	$\frac{1}{3} \times \text{base area} \times h$
Sphere 	$4\pi r^2$	$\frac{4}{3} \pi r^3$

1. Find the surface area and volume of the following figures.

(a)

(b)

Combination of solids

1. Find the volume of:

(a)

(b)

The angle between a line and a plane

1. Find the measure of angle ABC.

2. Find the measure of the angle AHG and DFH.

Exercise

1. A solid glass paperweight consists of a hemisphere of diameter 6 cm on top of a cuboid with a square base of length 6 cm, as shown in the diagram.

diagram not to scale

The height of the cuboid, x cm, is equal to the height of the hemisphere.

- (a) (i) Write down the value of x .
- (ii) Calculate the volume of the paperweight.

1 cm^3 of glass has a mass of 2.56 grams.

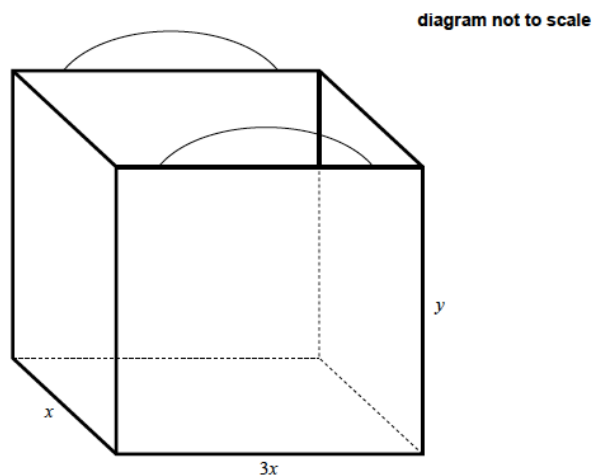

- (b) Calculate the mass, in grams, of the paperweight.

2. Haruka has an eco-friendly bag in the shape of a cuboid with width 12 cm, length 36 cm and height of 9 cm. The bag is made from five rectangular pieces of cloth and is open at the top.

- (a) Calculate the area of cloth, in cm^2 , needed to make Haruka's bag.
(b) Calculate the volume, in cm^3 , of the bag.

Nanako decides to make her own eco-friendly bag in the shape of a cuboid such that the surface area is minimized. The width of Nanako's bag is x cm, its length is three times its width and its height is y cm.

The volume of Nanako's bag is 3888 cm^3 .

(This question continues on the following page.)

(c) Use this value to write down, and simplify, the equation in x and y for the volume of Nanako's bag.

(d) Write down and simplify an expression in x and y for the area of cloth, A , used to make Nanako's bag.

(e) Use your answers to parts (c) and (d) to show that

$$A = 3x^2 + \frac{10368}{x}.$$
